

**TABLE OF PERMITTED DUTIES (Rev. 3//20/06)**

Following is a table of duties which auxiliaries are allowed to perform in California. If a duty is not listed, auxiliaries are NOT allowed to perform the duty. Under each category of auxiliary is one of the following notations: "N", "D", "C" or "G".

"N" = means that the auxiliary is NOT permitted to perform the duty.

"D" = means that the auxiliary may perform the duty under the Direct supervision of a dentist, which means supervision of dental procedures based on instructions given by a licensed dentist who must be physically present in the treatment facility during the performance of those procedures. The duty must be performed pursuant to the order, control and full professional responsibility of the supervising dentist. Such procedures must be checked and approved by the supervising dentist prior to dismissal of the patient from the office of said dentist.

"C" = means that the auxiliary may perform the duty under the supervision of a dentist or a Registered Dental Hygienist in certain public health clinics as specified in Business and Professions Code Section 1777 effective January 1, 2005.

"G" = means that the auxiliary can perform the duty under the General supervision of a dentist, which means based on instructions given by a licensed dentist, but not requiring the physical presence of the supervising dentist during the performance of those procedures.

Note: An RDHAP may perform any preventive or therapeutic duty that an RDH is allowed to perform under general supervision, provided that a prescription for hygiene services has been issued by a dentist or physician.

\*Those duties marked by an asterisk \* may be performed by an RDH without supervision if they are employed in a public health program created by federal, state, or local law or administered by a federal, state, county or local governmental entity.
